

Reading a Place

When you read a place, you can collect lots of sights.
Or you can collect **insights**. Today we will collect **insights**.

Start by just listing (you might use pictures instead of words) what you see.

Chicago in View

List/picture what you see. (observe, locate, collect information)

*Then choose the three **most important** parts of the city you see for each category.
(classify and evaluate information)*

Built Environment	Natural Environment
1	1
2	2
3	3

Insights

Summary

After you finish your chart, write a **summary** sentence about each column.

- *Built Environment*

- *Natural Environment*

Synthesis

Then write a **synthesis** sentence about the city based on your chart.
