

Dear, Mayor Daley

5-A-09

First, I would like to introduce myself.

Hello my name is [redacted] and I go to Ariel Community Academy. in a pleasant room of [redacted]. Next, I love sports like hockey, football baseball and basketball.

In the Chicago unit, we've learned lots of important events that made Chicago a nice place to live. First, we learned how the Chicago Fire gave architects a chance to build better buildings. Also, Daniel Burnham's 1909 plan allowed us lakefront parks and beaches.

My big plan is to have a grocery in all the

neighborhoods of Chicago. To get that, I need to move stores that are in the way. Next, I should know how much space is going to be used. Then, we will wipe out some streets while under construction. After that, it is necessary to buy certain types of supplies like a screwdriver, lumber and a hammer. Finally, we should ask construction workers if they can help us build it.

Next, this is a great plan because everyone could have a local market to go to. So I expect to see a lot of neighborhood stores and markets packed. Also, this might help Chicago earn lots of money from when people buy groceries. They pay sales tax.

This will help the city because it makes it easy to get local food for cooking in a much quicker way. Finally, that's why my big idea will help the city of Chicago be a better place.

Sincerely
