

May 14, 2009

Dear Mayor Daley,

First my name is [redacted] and I'm a student at Ariel Community Academy. I am a 3rd grade student. I like cheering for my school.

While at school I learned about Daniel Burnham. He was the architect of the Museum of Science and Industry. I also learned that Joliet and Maquette were the explorers of Chicago. I also learned about the Chicago flag.

My big bold plan is to have more L lines and more train tracks. To do that I will need space and land. Trains can cause more transportation and less driving. I would need materials, money and time to make this happen.

This is important to the city because people won't get hurt and people will stay healthy. We will also have better citizens.

Sincerely [redacted]
