

Dear Mayor Daley, 5/14/09

My name is [redacted]

I am a third grade student. I go to Anel Community Academy. I've been working very hard this year. Mostly we've been studying Chicago history and architecture. We've been 1st studying Daniel Burnham and Dusable.

We learned about Joliet and Marquette the explorers who found Chicago. We learned about Daniel Burnham the architect and planner. We've learned about Frank Lloyd Wright, he is a famous architect. Ludwig Mies van der Rohe he is another famous architect.

I want to make more pay phones because so people could keep contact with important people. Second, I will see people using less cell phones. Third, so you won't have to walk to tell your family friends the good news and the bad news.

3rd ↑

It is great because because  
you won't have to worry about  
charging your phone that long. Fourth you  
don't have to worry about your phone  
breaking breaking that easily. Fifth  
you don't have to go walk to pay your  
bill you can just pay your bill through the  
the phone. Sixth, when you have a pay  
phone you won't have to worry about  
getting a new payphone.

4th ↑

Finally Mayor Daley this how my  
idea is great! I hope we see more pay  
phones soon.

Sincerely

5-
