

Dear Mayor Daley

6/13/09

In my classroom we have really smart children. In my classroom we learn a lot, we always get the job done right. We love doing a lot of work and we learn a lot. That's how we get so smart.

We have learned a lot about Chicago. We even learned about important people in Chicago. We have learned about a lot of landmarks in the big city of Chicago. We always learned a lot about Chicago every day.

My really big plan is to fill in potholes in Chicago. I see a lot of potholes every where around the city. That's why I want to fill in the potholes around the city of Chicago. First, we need to get tar for the streets. Next we need to put it on the streets.

It will really prevent people from having accidents and having to get hurt and having to get their tires fixed. Then their tires will be messed up because there are these huge potholes around this city. It will really help people in the future because

there won't be as many accidents from potholes around the city.

The city will be having a lot of accidents. That's why I want to have all the potholes in the city covered up. That's why it really important. I want all the potholes filled in all around the city.

Sincerely,
