

Dear Mayor,

5/12/09

My name is [redacted]

In my class I learn Multiplication, Also I learn to write in cursive. I do many other things in school.

One thing I know about Chicago is that, Chicago started off with DuSable's trading post. I also know that Daniel Burnham made Chicago the great city it is today.

Another thing I know about Chicago is that before Chicago was a city, Lake Michigan was a big swamp. There were no buildings. There was lots of praries.

Although Chicago is a great city I think there could be some changes. My plan or idea is for every child 12 and under to go to summer camp for free.

The way I plan for my plan to work is the person that is the head of the summer camps meets with you and you will ask him/her if it is a good idea. Then when him/her sees the letter they will say the kids must really want this. Finally you will make the plan happen.

This is important to the city because it will give parents a brake. But also the children that is over 12 will still go but will pay and you will still be making money. Which is good for you. It will help the future because when the kids grow and grow and when they have children over the age of 12 they will have to pay for their children which once again is good.
