

5/13/09

Dear Mayor Daley,

My name is [redacted] and I am a Ariel Student. We've been learning a lot about Chicago. It's a great city, but we see changes that need to happen, I have one, too. We've learned that we have a lot of great architecture. Those are Chicago's biggest landmarks. One architect we learned about is Daniel Burham, the father of Chicago, Desable who made the first trading post in 1871. Back to my problem I believe there needs to be free after school tutoring for all students. I have a plan for the change. First, get materials. Second, make the schedule, where it's gonna be at is the community center. One of the community center assistants are going to teach. The kids will be dropped off by their parents or gaurdian. I think its a great plan to help kids to pass to the next grade so they could get an education and be like you

This will help our city by getting good education and hopefully get a good job

My plan is to give out free afterschool tutoring and I am a Ariel Community

Academy 3rd grader.

Sincerely,
