

May 14, 2009

Dear Mayor Daley,

First, I would like to introduce my self
I am [redacted] I go to school
at Ariel Community Academy, my teacher's
name is [redacted]. I am in third grade.
In my class we have been learning about
our city, Chicago. We have learned a lot
about the city.

In our study of Chicago, the third
grade classes have learned a lot about
Grant Park and a lot of different other Land-
Marks, in fact, every body in third grade is
doing research on a Chicago Land Mark. We
have learned about the Chicago Fire and
much more. There are a lot of things
to know about Chicago. Every body in the
class made a map of thier community and a
flag. Every body studied in a Chicago
book and answered questions about
Chicago.

My big bold plan for Chicago
is that there should be atleast one park

and school in each community.
If there is a park in all the
communities, children will not be
running in gardens, messing up and
picking flowers. If there is a school
in every community there will be less
pollution because people will be driving
less and walking a whole bunch more.

My big bold plan is important
to the city because there will be a
lot more gardens and more people will
want to visit and live in Chicago.

For the people that live in Chicago, they
will enjoy living in Chicago more.

A lot more people will be happy
because they will not have to spend
as much money on gas because
their children are walking to school.

If there are more gardens, in the
future, there will be less pollution
because there will be more flowers and
trees and they provide oxygen. Also,
people will be healthy because fresh
fruits and vegetables will grow in the
garden and the people can eat the
fresh fruits and vegetables.

With every community having

at least one school and park people will be more healthy. There will be less pollution and people will be happier.

Kids will be very excited about the new parks. I think having at least one school and park in every community is a fantastic idea! Lets really do it!

Sincerely,
