

5/14/09

Dear Mayor Daley

First, I would like to introduce myself my name is,

I go to Ariel Community Academy. I'm a third grade student. We are an small school. My teacher's name is,

Mrs. [redacted] in. but we call her Mrs. [redacted] and I love to play tennis, volleyball and dodge ball. They are really fun sports and they help you get lots of exercise.

In our studies of Chicago we have learned that you have been Mayor for 20 years. Wow!!! that's a long time!!! Also, I know that the first white stripe on the Chicago flag is the South Side, the second one is West Side, and the third one is the North Side. The first blue stripe is North Branch of Lake Michigan, and the last one is

South Branch of Chicago River and Great Canal. I made my own flag for my neighborhood. For my Chicago project I'm studying the Dusable Museum of African-American history.

My big bold plan is for smoking to stop. It should stop because it turns people's lungs black and people could also die from it.

Also, teenagers are starting to think smoking is okay so they start smoking, but smoking is not okay it's bad. Next I need people to sign a slip that says they want smoking to stop. In order to do this I need to change the law. If people stop I will give them gum instead of cigarettes.

This is a great idea because less people will die people will have healthier lungs, and there won't be a lot of pollution. When I grow up, and in order to make this plan happen, I will not smoke. I will show people what happens when you smoke.

So again Mayor Daley if smoking stops this is what will happen, less people will die, not much pollution will be in the air as before when people did smoke, and people's lungs will be healthier. I hope we can put my plan to action and really make it work!!

Sincerely

Ariel
