

Dear Mayor Daley,

My class is smart and fun to work with. Some of my classmates have to move a stick but the day still goes kinda good. Even sometimes we have fun. Here are some things about my classroom in Ariel Community Academy.

What my class has learned about Chicago is the stripes on the flag what they mean to Chicago. We learned about the 50 stars. We learned that they stand for the 50 states. My teacher taught us that the blue lines on the flag stand for Lake Michigan and the Chicago River. That is really close to my house. I see it every day coming to school.

My plan is to have free public transportation for parents who have children that are hard to carry and walk slow. If there was

free public transportation the parents would not have to carry their babies or wait for them to walk. They can sit down if there was free public transportation.

This is important for the city because ladies will not have to walk with their slow walking children or carry them. They can just get on the CTA, train, bus, taxi down town.

This is my idea that I think will change Chicago. If you make free public transportation for every girl who has a baby or is going to have a baby.

sincerely
