

Barnard School

May 15, 2009

Dear Mayor Daley:

I like 3rd grade in many ways. In 3rd grade we learn about recycling. You can recycle paper, cans, and plastic, and bottles. If you plant trees we get more oxygen. That is how you can save the environment in many ways.

Chicago is fun to learn about in many ways. Daniel Burham is a good city planner. Jean Baptiste Point DuSable left a legacy for Chicago. He had a trading post, they were chicken coops, dairy farms, tool shed. Jane Adams set up a place to help people and it was called a Hull House. Daniel Burham, Jean Baptiste Point DuSable, and Jane Adams are heroes in many ways.

I can make the city a better place in many ways. I will help the city by turning off all the lights in the city. When people come in the school the metal detector will go off.

We need more jobs in the city. I am going to help the environment in many ways.

(over)

Are you going to help your school, your city, and your dream? ()

Sincerely, [redacted]
