barnard school

Dear Mayor Daley:

My name is Melina Gonzalez and our class has many information in many ways. We are doing 2 projects the first one is about recycling the other about a praying mantis. We did a poster and report for the recycling project. We are going to take notes. Also the teacher said we are going to let them go when they grow up. They both have information in many ways.

We learn many thing about Chicago in many ways. We learned that Daniel Burnham was a city planner and, with out him we would still be living in a valley. Also Jean Baptiste Point DuSable left a legacy by trading because when he traded know we have money to trade. Also Jane Adams was a setteler she made homes for poeple to live. Also Abraham Lincoln let black people an white people live together. We learn many thing about Chicago.

I can make the city better in many ways. We can plant more tree to replace the ones that got turned into paper. We can also recyale pop cans, aluminum, and more things.
