Barnard School

Dear Mayor Daley:

I like third grade in many ways. In third grade we learned about recycling. You can recycle paper, plastic, and glass. If we plant trees we get more oxygen. That's how you ^{can} save the ~~the~~ environment in many ways.

- Chicago is a good place to live in many ways. Daniel Burnham is a good city planner. Jean Baptiste Point DuSable left a legacy for Chicago. He had trading posts and they were a chicken coop, dairy farm, stool shed. Jane Adams setup a place to help people and it was ~~called~~ called a Hull House. Daniel Burnham, Jean Baptiste Point DuSable, and Jane Adams are ~~heros~~ heroes in many ways.

- I can make the city a better place in many ways. I will help the city by turning off all the lights in the city to save more energy. When people come in the metal detector will go off. We need more ~~to~~ jobs in the city. I am going to help the environment in many ways.

- ~~Are~~ Are you going to help your school, your city, and your dream in many ways?

Sincerely,
