Dear Mayor Daley

I will love for people to stop smoking. I would like to see in the city of Chicago is cap smoking ban. This is a great idea because people can get cancer and they can die. Kids see that smoking they will think it's okay. People get crazy for that. What will the city need to do to make my plan happen? Is to put the people in jail, have the police to check them sometimes. They should have a camera that's watching so the security knows who's smoking or selling it. How will Chicago be different when they make this change? When kids grow up they won't be a person who's smoking when he/she should be in school.
