

Tell how Margie responds to important events

Event	Response
1. When Tommy and Margie started reading the book together	At first Margie was skeptical and confused on what the book was and if it was even necessary, but then she started to realize the importance of a real book that you could hold. She started to be educated on the learning ways of the past.
2. When the mechanic teacher from the future started to teach after they finished reading the book	Since she had just read about the past and how they used to learn in schools, the way that she had been learning currently seemed very antisocial.
3. Tommy finds the book	When Margie first sees the book, she doesn't even know exactly what it is. She has only been taught technology and not physical books, so she has never seen a book in the flesh. She was curious about the book after she learned what it was.
