Dear Mayor Daily

Our big idea for Chicago is to make more gardens in every neighborhood.

One reason that we think this is a good idea is that trees and plants can give us oxygen. They also help us and help people who have asthma. Another reason is it will make the earth and Chicago a beautiful place to live. It will take a long time to make the plants and trees grow because plants cannot grow in one day, but it will be worth it. The Chicago will look beautiful and smell good because of the flowers and trees.

Sincerely,

Daniel Boone ELEMENTARY School
