

Boone School 003

Dear Mayor Daily,

Our plan to change Chicago is to
make more solar panels. It is a great idea
because less energy will be used up.

Less gas will be used from the factory. spread it
on the news and television plus
computers. It will take 2 years to put
solar panels. It will cost a lot of money
for solar panels. Chicago will look different
when the mayor makes it happen.
There will be less pollution.

Sincerely,
Lya
