

CTE ACTIVITY EXAMPLES

Content Based

1. make a list of skills needed to accomplish a task
2. complete a graph
3. construct a graph
4. analyze a graph
5. make up math problems based on your subject
6. predict the result of an action
7. analyze the cause of a problem
8. write directions
9. diagram to show how one part of a situation affects others
10. make a model
11. compare/contrast two different styles
12. evaluate a product
13. design a new product
14. repair a _____ (could be plumbing, equipment, an automobile, anything that can break)
15. observe then model how to accomplish a task
16. demonstrate how to meet standards
17. use criteria to evaluate how effectively you or another student completes a task
18. respond to a complaint from a customer
19. write a report on how you completed a job
20. make and illustrate a step-by-step guide
21. change a plan or sequence of steps to improve it
22. report and then evaluate the performance of a task
23. invent a better tool to accomplish a job
24. create a plan for a business
25. organize a strategic plan to improve a business

Reading Based

1. Locate information to respond to a question; then write a response in your own words.
2. Write questions based on pages from the text.
3. Outline one page from the text, listing only the most important information. Combine with other students' outlines to digest the section.
4. Make a glossary for this week's section of the text.
5. Illustrate a page in the text—add your own drawing or diagram.
6. Create a study guide based on the text and your class notes.
