

May 13, 2009

Dear Mayor Daley,

We can make Chicago a better place by planting more trees. We should plant trees so we could have more paper, more pencils, and more oxygen. To get my plan going the city will need soil, water, and tree seeds. The city will be different because people are going to see trees in front of their houses, in the parks, and in the zoos. People could have a donation for the income tax. Because of more trees the city will be a healthier place.

Sincerely,
