Dear Mayor Daley,

You should give kids in summer water guns, kites, water balloons and cars to ride. Kids in Chicago should have some fun in the summer. They could make some new friends and get along with everyone. They have to do teamwork to have fun. They could play with water.

The city will need new makers to make water gun, kites, little cars to ride and water balloons. The city will need a lot of workers. In summer kids stay inside playing with toys. But in my plan they play with water and cars and kites. And they are able to enjoy the outdoors. This is my big plan.

Sincerely yours,
