

May 14, 2009

Dear Mayor Daley,

My idea is to put an elevator in all Chicago Public Schools because both third grade classrooms walk up 3 flights of stairs everyday. I am concerned about students that are handicapped. An elevator would make life a little easier for students who have a hard time walking up so many stairs more than one time a day.

The city will need to make more money to make my plan work. Chicago will be different because people will not complain about it any more and they will thank you for all you did and you will say you are welcomed.

Sincerely,
