

May 12, 09

Dear Mayor Daley,

My name is _____ I go to Hale
School and my room number is _____. When I
first moved here it was amazing. You did an
impressive job.

I've learned that a real Chicago hotdog has
everything except ketchup, I never knew that!
I also learned that everything looks green in most
places. I like the cookiecutter houses, I didn't
see many of them where I lived.

My idea is to change the gas to
different fuel. My teacher in second grade
tried to put vegetable oil in the gas tank
and started it up! I was very amazed.

It's important to the city because it has

Carbon dioxide in the gas. It will stop killing trees so we can breath better. Also people will get hurt if too much will get up there throat and get sick.

Please don't forget that the gas hurts the air. Thank you for your patience.

Sincerely,
