Dear Mayor Daley

I am . I'm 8 years old. I like to play a lot and ride my bicycle.

I've learned a lot about Chicago. an Chicago is a community that has bicycles and cars and a lot of more things.

Here is a plan you could use. You could put two lines lines and one of the lines could have a car so that the part that has the car is the part were cars drive and the other part has

a picture of a bicycle and that part is where the bicycles ride.

My idea is important to the city because when ever people are going to ride their bicycles they don't have to worry about cars because cars will be in another part and this will make Chicago safer.

My idea will help the future making Chicago a safer place to live.

Thank you for helping the world.

Your friend,
