Dear Mayor Daley,

My name is . I'm 9 years old and I'm in third grade. We are learning about Chicago history. We learned the history of the Chicago style hot dog. We also learned about the Hull House. We learned about Jane Addams. Jane Addams made the Hull House to help people.

My idea to help Chicago is we should not use paper too much because if we do we will be killing trees, and then nothing will clean our air.

This will help our city because the gas that comes out of our cars is bad for the air. The trees will clean the air.

Thank you for reading my letter and I really think that this might help our city.
