Dear Mayor Daley,

My name is _____, I'm 8 years old. I'm in third grade and I go to Hale Elementary school. In my free time I like to study for upcoming tests.

In social studies we learned about Chicago. We read an article about Jane Adams. She made a house called the Hull House. It was for poor people and for people that lost their jobs. She had some really interesting ideas.

I would like to sell more vegetarian foods in the school canteen because the vegetarians can't eat meat. We can give them some of their food and people should start eating more healthy foods.

My idea is really important because if people don't eat healthy food they will be lying down on the couch surfing the TV channels. Would you want that to happen? Or do you want them to be playing outside?

I hope you go along with my idea because it would really mean a lot to me. If everybody starts eating healthy food. Thank you for taking the time to read my letter.

Sincerely,
