Dear Mayor Daley,

My big idea is, the city should build more shelters for homeless people. The homeless should be helped. They need homes so they can be safe.

To make this happen the city needs to have an architect draw a plan of where the shelters should be built. Then get the Extreme Make Over show to build the shelters for free.

Chicago will be a much better place because homeless people will have a place to live. They will feel the city cares about them.

My plan to build shelters is great because people won't live on the streets.

Sincerely,

Homeless Shelters
