Dear Mayor Daley,

I think that there should be more gas rebates in the city. The price of gas going into homes is too expensive. The price of gas is causing a lot of people to move out of the city. Some people have to turn their heaters off to afford to live in their houses. Those people have to live in the cold.

The Chicago gas companies need to make more rebates to make it so people can have heat in the winter. Could please you tell the gas companies to have more rebates? PEOPLES GAS gives people who are new to Chicago rebates!

I hope that you will be able to do this.

Sincerely
