Dear Mayor Daley,

I think we should lower house bills so pore people can have some places to live and we can make a big building so pore people can go there and eat sleep and go to the doctor or hospital. We can also try to let the pore people have clothes not just give them a home and they will have to wear the same clothes over over and over over and over again till it rips and the have nothing to wear. We can also let the pore people go back to school if they want so Sinerely, they can have a better life and we will all have a good life!
