

June 22 Name: _____

Make Interesting Idea-Example Connections*ILS 5A—I can locate and collect examples relating to an idea.*

Whitehead said that the problem of education is to enable the learner to see the wood by means of the trees. The “wood” is an idea. The trees are examples.

List 2 interesting examples that support that idea from the reading assignment. To make this even more interesting, you can draw a picture in each box and then write a caption.

Bring this completed assignment to class to share with others at the next session.
