

Dear, Mayor Daley

I am a student from Lincoln Elementary School named [redacted] and I want to make Chicago a better place by Saving Energy. I want you too try to make people stop driving and start walking or biking.

but i will tell you what you need to make this happen you might need some space and some money to make some places to keep your bike. It might take a long time because it is difficult to make people change there minds or habits. And the city should provide more places to ride your bicycles, for example near parks or close to your house.

So the citizens will breath better and be less sick of used energy. The city will be more quiete and less dangerous because of pollution.

Sincerely [redacted]
