

Dear Mayor,

Were you wondering about nature? Nature is one of the important things in my life. That's why I cried when my oldest brother Chiery broke 2 branches from a tree. I want you to make Chicago a better place, even if not from here, by putting nature almost everywhere, and a lot of pollution away. You can also make green schools where you pick up garbage and more. Please follow these ideas. If you do that, you will be the best mayor in the United States. Thank you for reading.

Sincerely,
