

5.13.09

Dear Mr. Mayor Daley,

I want to make you aware of all the garbage that has a bunch of recycling in it.

My big idea is to put recycling bins in public neighborhoods.

It is a good idea because it will lower our carbon footprint and make Chicago neater.

This plan will not cost much money and it won't take much time.

It will help by.....

- it will help the earth
- more people will recycle
- Chicago will be clean
- it will not cost much money

Chicago will be a better because it will be cleaner and it will help the environment.

If you do this idea Chicago will be happier.

Sincerely,
