

Dear Mr. Mayor

I always see Bike riders on the street and it is scary because the cars almost hit them. My idea is to protect bicycle riders by building a bicycle lane that is divided from the street, sort of like a sidewalk is. I would put rails or something so the cars can't go there they can hang flowers planters on the rails. then more people will ride bikes. Will is good for our environment because there would be less cars to pollute the city. We can do this by putting concrete over the lane for bikes and to make the rail you can buy a rail and buy flowers I think this would make our city better and safer for everyone.

from,
