

Dear Mayor Daley,

My big idea is to make Chicago a smoke free place through healthy gum called "Minters".

"Minters" are green gum that are a flat, minty healthy, alternative to cigarettes, and only has 2 pieces of sugar. "Minters" will be available to anyone who has a smoking problem. "Minters" will help eliminate smoke in the air. "Minters" will also help people have healthier lungs. I predict that Chicagoans will have less problems breathing our air and it will probably lower chances of getting asthma.

I think it would be great because helping people to stop smoking will also help end a lot of health problems.

Sincerely,
