

Dear Mr. Mayor,

My idea is to put all waste in one spot of Chicago. This is a good idea because then we can make the extra space for animals and plants, and Chicago won't smell bad near the dumps. We would need to buy a lot of trucks, and tell people to help buy them. And plant more trees for the animals, and the trees will help make homes for the animals, and air for us. In conclusion, Chicago will be a better place for animals, and plants.

From,
