

Dear Mayor Daley,

I think everyone does not like smoking even people who do it EVERYONE hates smoking. It's bad for you and effects everyone. Even if people do not know it. It ruins our environment. With all the smoke going into the sky, that nice blue sky, can go into a bad gray sky. Then what will we do about that? So I think we should have smoking houses so smoking can not get into our sky! Smoking houses will have no place where the smoke can get out so people who chose not to smoke wont have to walk through the smoke ever again. Also kids and not kids are getting sick with all the smoke around them. That is my big idea. I would really like it if you answer this letter. Thanks for reading this.

Sincerely,
