

Dear Mr. Mayor,

There is a smoking problem in Chicago. Let me explain. One day me and my family went to a restaurant with a "no smoking" policy. But when we got there there was a group of people smoking at the door outside. The smoke also went inside. There should be a law that people can only smoke in their home. Smoking is causing air pollution and if smoking in Chicago keeps up, Chicago will be very dirty and people will move out of it. The environment will help the city look beautiful.
