

Dear Mr. Mayer,

I think that you should make a law about not cutting trees down (at least not as many) and instead plant trees. You should ask every one to plant a tree on Earth Day. This will help us and the community.

Today we suffer. Years later we will be in peril. You see there is a cycle that will go on for a long time. The cycle is like this: Pollute the earth, which hurts the ozone, which kills trees, also man killed, which hurts the earth, which hurts us.

You see it is quite simple. If we continue to do such things we will end up extinct soon. You are half in charge of all the people in Chicago. Use your power to help all!

I hope you consider this. It might make you a hero and the earth a safer place.
