

Mayor Daley

Dear Mayor Daley:

My name is _____ from Abraham Lincoln Elementary School. I am in third grade. Chicago is having a little bit of a problem. People throw things away when they use it at the the first time. The city will need to recycle more to make our planet better. Chicago will be a better place if people start recycling.

In office building, I think people should turn their thermostat to 68°F during the heating seasons and to 78°F during the cooling season. This helps reduce the amount of energy used to keep your office at a comfortable temperature. Layer on clothing or keep a sweater hand for that extra bit of warmth and comfort.

I think people should turn off their light when they are not using it. All too often, light are left on in classrooms and lounges overnight even though there is no one around. This is a waste of energy that can easily be prevented if people remember to turn off the light when they leave a room. However they are expensive and most rooms on campus do not have them yet so please, remember to turn off the light.

I think this is a great idea because recycling and not wasting energy is very important to the world and if people Recycle, Reuse, and Reduce, it might help.

Chicago to be a better place.

There is one thing that you need to do to make Chicago a better place. That's changing Chicago by telling them or writing it in newspaper and people need to reuse what ever they use at the first time.

Sincerely,
