## Math Operations Assessment

CCSS Math Practice Standard 2. Reason abstractly and quantitatively.
Use the operations and kinds of numbers you know to complete this chart. We did the first row for you.
You can turn this into a math challenge-you put the parts of the equation on a row and the answer, give it to another student to finish that row.

| Number | Operation | Number | Equals | Result |
| :---: | :---: | :---: | :---: | :---: |
| 42 |  | 20 | $=$ | 22 |
|  |  |  | $=$ |  |
|  |  |  | $=$ |  |
|  |  |  | $=$ |  |
|  |  |  | $=$ |  |
|  |  |  | $=$ |  |
|  |  |  | $=$ |  |
|  |  |  |  |  |

Make it more challenging-make another chart that has 7 columns, so that you do more than one operation.
