

5/12/09

Dear Mayor Daley,

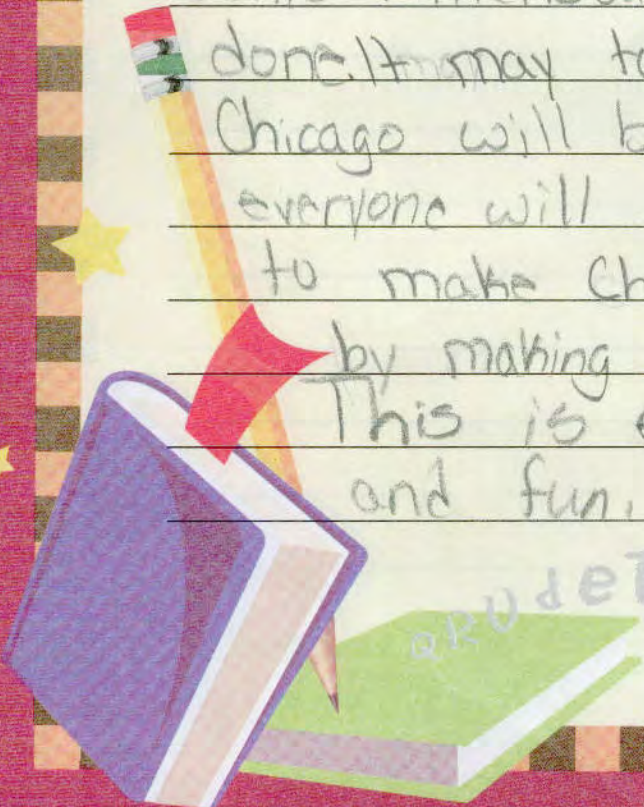

We would like to make Chicago a better place. There is one change that we want, and it is to make a laptop that is free and educational. The laptop should be given when kids enter school. It would also have an alarm/lock to keep kids off inappropriate websites. This is a great idea because it can help kids that are not that smart. We will need some time. But the plan can be

done. It may take some weeks or months. Chicago will be a better place because everyone will be smart. We want to make Chicago a better place by making every one smart.

This is educational and fun.

They will also be focused on school work. All the kids in the city will be very smart and intelligent. You are a awesome mayor. We hope you make this change.

Sincerely,

P.S. This is a picture

of the letter.
