Dear Mr. Mayor,

Hi! My name . My school is Murray Language Academy. We are learning about Chicago. We learned about Jean Baptiste Point DuSable. He was the first one to build a trading post in Chicago. We also learned about the Great Chicago Fire.

I have a plan. Let's make more eco-friendly cars to make Chicago better. I don't want to much pollution in Chicago.

I think you should pick my idea because we want Chicago to be bigger. Not smaller. So if we make more eco-friendly cars Chicago will be less polluted. And more people would stay in Chicago.

We would have to hire lots of people. Maybe the homeless would get jobs. We would do funraising in schools. The money would go to make more eco-friendly cars. I can't wait to see Chicago prettier.

From
