

Dear Mr. Mayor,

May 14, 2009

I want to make Chicago better by making more forest preserves. Chicago would have more green space to make the community look better. Also, neighborhood parks in Chicago will have more space for family gatherings, and a place for families to have fun.

My idea would give more people jobs. Their job would be to take care of the plants and help people find out where they are going to have a gathering or something. Some other people will have the job to make sure families have what they need.

Mr. Mayor please take my idea seriously. See you and your family at the forest preserves.

Sincerely yours
