

Dear Mr. Mayor

5-14-09

I want Chicago to be a better place by keeping plants healthy.

The city has so many plants I can't name them all trees, daisy, dandelion, daffodils, marigolds, rose, mayflower, sunflower, violets, and bleeding hearts. People like flowers but not the same flowers, they just need to help out.

Plants will keep our environment healthy and more green.

Also, plants could get kids inspired to help the earth and communities could have a place to come together.

Mr. Mayor please consider my idea... and maybe one day I will see you at the garden.

Sincerely - Yours,
