

Pope School

Dear Mayor Daley
I think we should make changes
with video games i think we should
teach teachers how to make video
games in school.

It would help people of Chicago for
they wouldnt have to not spend
lots of money on video games like
play stations, X-box 360s when the
people are struggling.

So the teachers will have to
be trained really good for the
teachers will not mess up the computers
then the teachers will teach the
students how to make video games.

And i think posible to teach
the teachers how to make videogames
with your help.

Sincerely,
