

Dear Mayor Daley, May 12, 2009

I want to make Chicago a better place by having more gardening stores so people can buy seeds to plant vegetables and fruit. We can grow tomatoes, onions, lemons, pears, and apples. We can even plant trees so we can have clean oxygen for the people to breathe clean air.

To carry out my plan we need to hire builders to build the garden stores. Also people would have to work in the store to teach people more about planting.

Chicago will be different because there will be more trees, gardens, fruit, vegetables, and flowers.

I hope you like my plan for Chicago.

Your friend,

Keilly school
