

Dear Mayor Daley, 5/13/09

I think there should be more public pools around Chicago's neighborhoods. In the summer people like to swim and there are not a lot of pools here. The pools are overcrowded.

Also on a hot day people need to cool off. When they swim they are getting great exercise so that will help the people of Chicago stay in shape.

To make my plan happen we will need clean areas. Also we will need hard-working people to design and build the pools.

When this happens Chicago will be different because we will be seeing more pools. On hot days we will see more people enjoying the outdoors because of the pools. I hope you think about my plan.

Sincerely,

Reilly School
