

Dear Mayor Daley, May 13, 2009

My plan is to have free internet for the whole city of Chicago because it could help many people that live in the city of Chicago.

My plan for the city of Chicago is good because people wouldn't have to pay for internet. The second reason I think my plan is good is because people that live in the city of Chicago could get one little thing for free so they have money to pay for everything else.

Also, the students will all be able to use the internet to help them with their homework. I think my plan will make Chicago a better place because the internet is an important part of people lives. Most people need internet because if they have homework and they have to do it on the computer that person wouldn't be able to because that person doesn't have internet

Sincerely,

Reilly School
