

5/14/09

Dear Mayor Daley,
How are you? I have an idea for
Chicago. My idea is to have
windmills, solar powered cars, buildings,
and houses.

I think this is a good idea because
then we will not pollute the air.
Also, we will get energy from the
sun and not electricity.

To make this plan happen you
would need to get solar
panels and put them on houses
and buildings. For cars you
would need more scientists.

The city will be better because
we will be like California. Also, the
earth will live longer.

Your citizen,
