

Dear Mayor Daley, May 14, 2009

How are you doing? I think that you should lower bills because then some people could have left over money and could spend it on their home, food, supplies, or for their clothes. Also, people in Chicago could use a hand with bills because some people may not have somewhere to work and some are sick. For example my dad, brother, sister, and my sister's boyfriend are working because my mom can not work because of her back. That's why my dad is having problems with bills because he only gets paid every Friday. He doesn't have a lot of work to do. So he works the whole week but sometimes only two days so I really want you to lower the bills. The most I want to lower are the gas and light because people usually use light and gas. I hope this change can be made.

P.S. My name is _____, Do you have any sons or daughters? Please reply back!!

Love, ...
